Date 1/29/90

From Tracy Graef

FORM 1

An inspection was conducted at this site on this date. Observations and comments are noted below:

Inspected this site on Jan. 25 with Barb Cole & Dan Campbell from OEPA. ^{There} ~~at~~ did not appear to be any more fly ash than on my last visit on 1/3/90.

Barb & Dan both agreed that something needs to be done about the site, and she feels 3745-27-13 should be met, but they're waiting for clarification from Columbus on the matter. In the meantime, she is going to write Alcine a letter. We have a meeting scheduled on Feb. 15, 1990 w/ Alcine at which time he should have results from EP Tox Test.
